Update from US Treasury - September 1, 2021:

The U.S. Treasury understands that some recipients have had technical problems that have made it difficult for them to submit their interim reports on time. Treasury continues to assist individual recipients and hopes to resolve remaining technical issues as soon as possible. Those recipients who made a reasonable effort to file before the deadline will not be counted as late if they experienced technical issues in the reporting system that prevented them from filing on time.
